Make UKG Dimensions Changes with Confidence

YOU'VE MADE THE SWITCH TO UKG DIMENSIONS, SO WHAT COMES NEXT?

Now it's time to shift your focus to managing changes to your WFM solution 24/7 and maintaining what your team has worked so hard to implement. Changes to your UKG Dimensions solution can come from:

- Federal, state, municipal & city-specific labor law changes
- Changes to paid FMLA and sick leave
- New corporate policies
- Union contract negotiations
- Opening new locations
- Acquisitions, mergers, and divestitures of new locations/business units
- COVID related business changes

It's also your responsibility to validate every UKG release and update to ensure there isn't a negative impact to your employees. Unfortunately, you don't fully control the timing of these releases.

MAKING CHANGES TO YOUR UKG DIMENSIONS SOLUTION CREATES RISKS

The changes you make can cause severe disruptions to your business and your employees' paychecks. Not proactively validating changes before they impact your employees can paralyze your organization and prevent you from maximizing the value of your WFM investment.

You must have a **continuous testing program** in place to proactively verify every single change to your WFM system. Only by testing comprehensively and continuously can you be confident that you're paying your employees correctly and that you stay in compliance.

*TestAssure.ai is a comprehensive **automated** testing platform that enables you to test your UKG Dimensions solution **continuously** so you can make changes and accept UKG releases with confidence.*

TestAssure® | UKG Certified Partner

WHAT CONTINUOUS TESTING CAN DO FOR YOUR ORGANIZATION

Respond to Business & Policy Changes Faster
Respond quickly to ever-changing policies, labor laws, and business-driven changes.

Easily Accept UKG Releases & Updates
Accept releases & updates without disruption and take advantage of new functionality.

Make WFM changes with confidence
Be confident that you're continuing to pay your people correctly and are still in compliance.

HOW TESTASSURE.AI ENABLES CONTINUOUS TESTING

Test Case Library & Pre-Built Automations
Use our library and automations to quickly and easily setup regression tests (no coding needed).

Maintains Your Automations for You
We constantly maintain your automations for you and update as needed with every release.

Runs Your Automated Test Cases Regularly
We run your test cases every month so they're always ready for you at the click of a button.

Provides Automated Monitoring & Alerts
We run and monitor your automated testing for you, so you only need to respond to issues.

"TestAssure's automated testing platform provides exceptional value to UKG customers. It expedites test case development and execution. TestAssure can automatically execute test cases and provides long-term value as customers can re-execute their tests in minutes."
- Andrew Molski, Global Program Manager, UKG
