

# Q2R12 Release Update

June 27 , 2023

*The following information is TestAssure Confidential and subject to change. It is intended to outline our general production direction, provided for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described for TestAssure products remains at the sole discretion of TestAssure.*

# Features List Summary

- Test Plan Listing Update
  - Test plan dashboard will now show “unable to execute” metrics.
- Right Click Menu for Test Cases
  - The right-click menu on test cases now shows the same options as it did on a folder.
- User Roles
  - New user-roles to provide more control over who can do what in TestAssure.

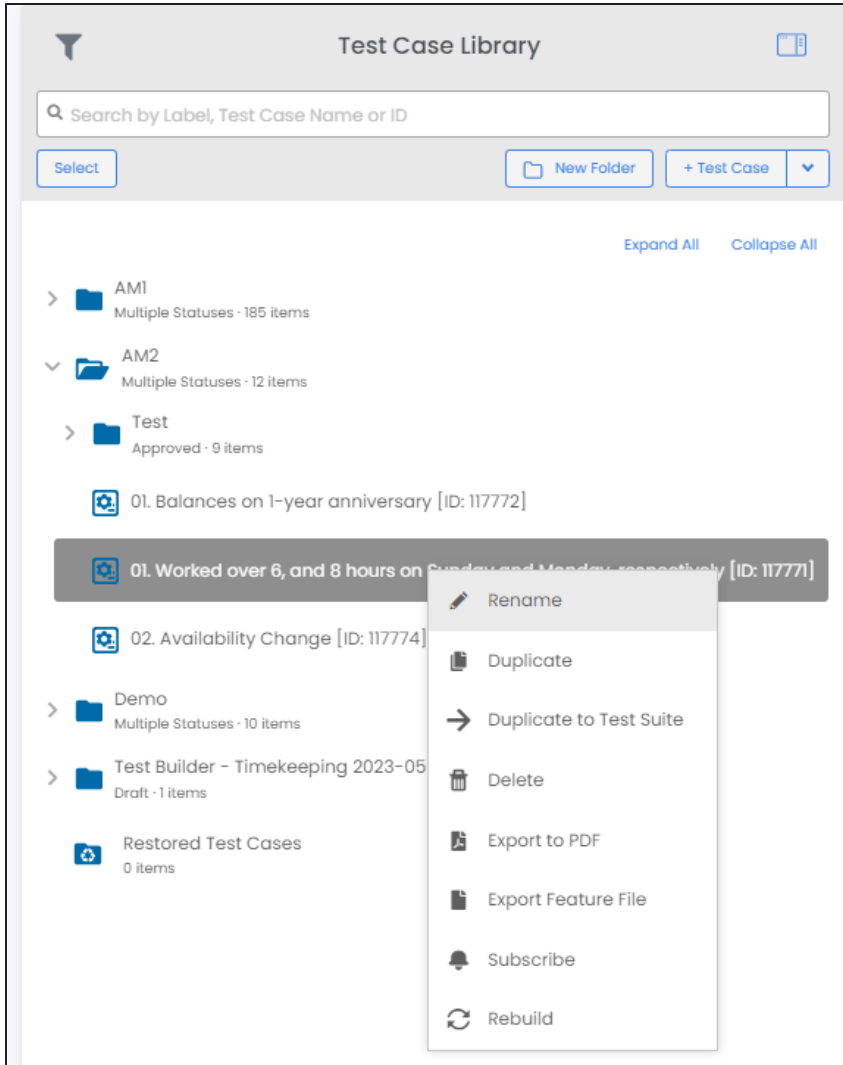

# Test Plan Listing Update

Test Plans						Create New Test Plan
Open Test Plans						
Name	Scheduled Execution	Test Cases	% Pass / Unable to Execute / Fail	% Automation	Edit	
Regression Tests		14	 6/14 Passed	 10/14 Automated		
Test Plan #1		18	 13/18 Passed	 18/18 Automated		
Test Plan #2		6	 3/6 Passed	 6/6 Automated		
Test Plan #3		5	 2/5 Passed	 5/5 Automated		

In the Test Plans listing, “Unable to Execute” tests are now included in the bar graph to give a more accurate representation of the test executions.

# Right Click Menu for Test Cases

The right-click menu on test cases has been enhanced to show additional options such as:

- Rename
- Duplicate
- Duplicate to Test Suite
- Delete
- Export to PDF
- Export to Feature File
- Subscribe

When choosing to rename a test case from the menu, the title will be editable inline.

# User Roles

The following is a summary of all the roles available to Partners and Customers.

- **TestAssure Partner:** Currently used by partners. It allows them to create test targets, test suites, test cases and execute test plans. Partners can continue using this role if the granular roles below are not required.
- **Project Manager:** Allows the user to only create test targets and test suites. Use this to designate one person as the administrator of the tenant.
- **Test Editor:** Can create/import personas, write test cases and use Test Builder. Can also review and assign tests.
- **Test Reviewer:** Can only update the Review Status of a test case. Test Reviewers can no longer change the Assign to User field.
- **Test Assigner:** Can only update the Assign to User field on a test case.
- **Automated Tester:** Has read-only access to tests and can execute them.
- **Manual Tester:** Can create and execute manual tests.
- **Actions Viewer:** Grants access to the action library

Recommendations:

- For partners, continue using the TestAssure Partner role unless more granular controls are needed.
- For customers, use the Test Reviewer and Test Assigner roles so they can review and assign tests. Remove the Test Assigner role from any reviewer that does not need to assign tests.
- If customer is writing and/or executing manual tests, use the Manual Tester and Actions Viewer roles.

# Summary of New Roles

	<b>Project Manager</b> Create Test Target & Test Suites	<b>Test Editor</b> Can write, rebuild, assign, review, duplicate, etc.	<b>Test Assigner</b> Can change test case assignee	<b>Test Reviewer</b> Can change test case review status	<b>Automated Tester</b> Can only execute automated tests	<b>Manual Tester*</b> Can create manual actions and execute only manual tests
Administer tenant	X
